

# Q1 2026 Revenue Review

January – March 2026

Prepared for the Leadership Team

# Revenue by Region & Month

Grouped column chart — every region's monthly trajectory

# Key Numbers at a Glance

## North

\$128,000

\$149,000

+16.4% growth

## South

\$84,000

\$91,000

+8.3% growth

## East

\$61,000

\$66,500

+9.0% growth

## West

\$45,000

\$52,300

+16.2% growth

Total Q1 Revenue

**\$1,007,200**

Best region: North · \$412,500

Revenue grew 12.8% from January (\$318,000) to March (\$358,800).

# Risks & Observations

## Uneven regional performance

North contributes 41% of revenue — heavy reliance on one region. East & West are below expectations.

## East dip in February

East revenue dropped 4.6% in Feb before recovering. Investigate whether this was seasonal or operational.

## Customer growth lagging revenue

Customers grew only 7.3% (127→136 avg) while revenue grew 12.8%. Acquisition cost may need scrutiny.

## West region — small base risk

West has the fewest customers (140) and lowest revenue (\$145K). Any churn impact is proportionally larger.

# Next Steps

1

## Diversify revenue base

Launch targeted campaigns in East & West to reduce North dependency from 41% to 35% by Q3.

2

## Root-cause East dip

Analyze February operations in East; implement lessons into Q2 playbooks.

3

## Improve customer ROI

Review CAC by region and channel; aim for customer growth to match or exceed revenue growth.

4

## Scale West pilots

Test two new market-entry tactics in West with \$25K budget; report results by mid-Q2.
