Risks & Observations

1. East region dipped in February (-4.6%) — monitor for seasonality.
2. West has the smallest base; a single large deal swings results.
3. Customer density (revenue/customer) is highest in North — potential for upsell.
4. No region showed negative growth Q1, but pace varies widely.

Next Steps

1. Deep-dive into East February dip — root-cause analysis by 15 Apr.
2. Set Q2 targets per region (North +10%, others +8%).
3. Launch upsell campaign targeting North's high customer density.
4. Review West pipeline — identify 2–3 anchor deals for Q2.
